

Those of you who accessed the updated member roster for Feb 2020 yesterday must have noticed that there were several errors contained therein! In fact some of you advised us of that fact, quite diplomatically I might add! Well, you can all rest easy now since our crack volunteer officer corps has addressed the problem and corrected the updated rosters. The updated/updated rosters are now on the website (again) and ready for your perusal, thank you very much! Seriously, we do appreciate the feedback about the incorrect information in the first updated roster. Without that input, we would likely be unaware of the errors that do sometimes occur in sufficient time to make timely corrections.

You must understand that in an operation as huge and complex as this ☐, minor errors do occasionally occur. Thank you for your understanding and at this juncture, to those who were agitated because of the inadvertent errors, just get over it! ☐

Hope everyone has a "dandy day", as my favorite ATC controller at the old Stapleton Airport used to say when switching you over to another frequency. (Some of you more seasoned members may remember him).
