

Former Golden Eagles member and Continental pilot George Vermef has requested that the following sad news be shared with the Golden Eagles membership, and we are glad to comply with his request. Former Golden Eagles member and Continental pilot Gus Wenzel took his last flight West back on August 24, 2019 as a result of his succumbing to liver cancer which had metastasized. His wife Guen passed 11 months later from advanced Alzheimer`s disease. Their son and daughter were present with both parents for a few days before their deaths when it became apparent that end of life was approaching.

The Golden Eagles sends belated condolences to the family of Gus and Guen for their loss. We hope that the memories of their loved ones will bring them lasting peace and comfort.

It was requested that the following notice of the celebration of life be communicated to the Golden Eagles membership for those who may have known Gus and Guen.

**Guen and Gus Wenzel**
